Full Stack Developer

Company Overview

Join Westland Real Estate Group, an innovative leader in real estate ownership and management. Spanning over 150 properties across three states, our company is at the forefront of the industry. We're expanding our technical horizons and are on the lookout for a skilled Full Stack Developer to enrich our dynamic development team.

Position Overview

As a Software Developer at Westland, you'll be a key player in our Business Development team, spearheading a range of coding initiatives. Your primary focus will be on crafting and enhancing the user interface of Westland's internal applications. Additionally, you will contribute to various back-end and database projects, playing a versatile role in our technology department.

Key Responsibilities

- Collaborate with the development team to conceptualize innovative software solutions.
- Design and implement the front-end of applications, ensuring visually appealing and intuitive interfaces.
- Develop, manage, and optimize well-functioning databases and applications.
- Create and maintain effective APIs.
- Conduct software testing for responsiveness and efficiency, ensuring high-quality outputs.
- Troubleshoot, debug, and upgrade software to enhance performance.
- Produce comprehensive technical documentation.
- Work closely with data scientists and analysts to refine and advance software capabilities.
- Implement and maintain testing automation to ensure software reliability.

Qualifications

- Bachelor's degree in Computer Science or related field.
- At least 2 years of full-time, relevant experience in software development.
- Strong knowledge and experience in Full Stack development, including:
  - TypeScript
  - React / Redux

- ○ Python
- Proficiency in cloud computing and experience with cloud resource management (GCP experience is advantageous).
- Experience in working with APIs.
- Additional proficiency in Tailwind CSS is preferred.
